

Bridge Resource Management

Leadership and teamwork for navigating officers

This three-day course optimizes your leadership and teamwork skills on the bridge of seagoing ships. You work through realistic scenarios on full-mission bridge simulators, complementing theoretical knowledge with hands-on experience. The training covers situational awareness, communication, decision-making and emergency response. After completion, you meet the STCW requirements for Bridge Resource Management.

About this course

Location	Lloydstraat - Rotterdam
Language	English
Education Format	Classroom
Type	Basic
Erkenning	DNV-GL

General information

The course Bridge Resource Management (BRM) has the objective of optimizing the knowledge and skills of leadership and teamwork at operational and management level on board of seagoing ships. A bridge team needs to possess this insight and these skills in order to guarantee a safe and efficient passage in areas of high density traffic such as the entry and exit canals towards ports and passages of 'congested areas'.

The course is developed in accordance with the dispositions in section A-II/1 and A-II/2 of the Standards of Training, Certification and Watch keeping for Seafarers (STCW), 1978, as amended. The course has been accredited by DNV-GL.

Programme

During the three-day course Bridge Resource Management (BRM) you tackle realistic situations on our Full Mission Bridge simulators. These exercises are an ideal complement to the required theoretical knowledge.

The following learning objectives play a part during this course:

you have the knowledge and the capacity to apply effective resource management:

- allocation, designation and prioritization of means
- effective communication on board and onshore
- decisions taken are in correspondence with the experience of the team
- assertiveness and leadership, including motivation
- obtaining and keeping of situational awareness

you have practical knowledge of personnel management and educational roadmaps

you have knowledge of related international maritime conventions and recommendations and national legislation

you have the capacity of applying workload management, including:

- planning and coordination
- task distribution amongst all personnel
- limitations of time and means
- prioritization

you have the knowledge and the capacity to apply decision making techniques:

- situation and risk assessment
- identification and consideration of generated options
- selecting of work procedure
- evaluation of the effectiveness

Result

At the end of this course:

- you have developed a positive standing regarding safety and collaboration
- you understand the importance of operating procedures
- you are better capable to collaborate on board
- you are able to elaborate a short and concise passage plan
- your management skills have been strengthened
- you have optimized your skills in terms of safety

Target audience

You are a navigation officer working on the bridge of a seagoing ship or you are following education to become navigation officer, for example pilot, master, navigation officer or student after completing your internship at sea. You are working in the maritime sector and are due to your activities and involvement part of an operational bridge room team.

Practical information

Entry requirements	If you would like to attend this course, you need to be familiarized with the activities on board. This experience is necessary in order to understand that leadership and teamwork are essential components at operational level.
