

Health & Safety in Port & Terminal Operations

Reduce risks and improve safety in port operations

Ports are categorized among the highest-risk work environments due to the constant movement of heavy cargo and equipment. This course teaches you to identify safety hazards, assess risks and implement prevention measures in port and terminal operations. You will learn about regulatory requirements, safety management systems and best practices for reducing workplace incidents. The training is designed for anyone working in or around port facilities.

About this course

Language	English
Education Format	Online
Type	E-learning/self-study

General information

Ports have been categorized as one of the highest risk sectors to work in. This is due to the many safety hazards workers face on a daily basis. The main health risks are caused when moving loading vehicles, unloading and loading cargo. These health and safety risks may be reduced if workers are constantly reminded and are aware of the many hazards that they face.

This short course of 6 hours will focus on the various health and safety risks workers are facing. Port and terminal workers can be exposed to more health and safety risks than strictly related to the function they have. The surrounding can be hazardous. With this course we look at the broader aspects of these risks in order to diminish the chances of accidents and keep workers available for the processes hired for.

Programme

The short course objectives provide an overview of the topics that will be covered during this short course. After finishing the course, you will have enhanced your knowledge of health and safety in port and terminal operations.

During this course, health and safety rules and regulations are addressed in relation to the four areas of current activities at ports and port terminals:

- Gate
- Yard
- Vessel
- Warehouse

Result

After completing the course, the participants will be able to:

- Recall the regulatory requirements for health and safety in ports and terminals.
- Identify existing safety measures.
- Implement and maintain of existing health and safety measures.
- Select the relevant safety measures appropriate to the situation.
- Act by stopping unsafe practices.
- Report any hazardous or unsafe behavior.
- Report all incidents or accidents

Target audience

The program is specially designed for any person working in the port or crossing the port premises for any reason, especially:

- Port workers (experienced or not)
- Port authority and Government officials
- Those with professional degree with the need to gain specific knowledge in health and safety fields
